

Foundation One
Home-School Challenge

WC: 18.11.19

This week the children have been learning all about Autumn and during our very busy week we have been:

- Printing and rubbing leaves to create beautiful pictures.
- Looking at different autumn objects in our water tray and working out which of them would float or sink.
- Creating repeating patterns at the maths table.
- Building nests for the hedgehogs to hibernate inside,

Next week we will continue to learn about autumn and based on the children's interests during this week will be looking at different birds. For your homework you could draw a picture of any birds that you see over the weekend, I wonder if anyone will be lucky enough to see a robin. You could maybe keep a tally and count how many birds or animals that you see over the weekend and write the total number in your books.

Thank you for your hard work and continued support.
I look forward to another wonderful week in Foundation One.

Mrs Heaton
