

Important Information

"Oak National Academy is a new collection of high-quality lessons and online resources. Backed by the Government, it has been created in response to the coronavirus lockdown.

Their online classroom offers free access to great teachers, delivering video lessons, quizzes and worksheets. Available for both primary and secondary levels, it covers a range of subjects. All of the lessons are ordered so your child can learn along a clear plan. They'll provide new lessons and resources each week.

Oak National Academy will fit alongside other resources such as BBC Bitesize to offer a structure for the day for children until schools fully reopen.

Oak National Academy was built at speed; at present their resources are for pupils who usually access their schools' curriculum in mainstream education, from reception through to year 10, without significant support or adaptation. They're currently working on providing support for teachers working with pupils with additional needs, and teachers based in specialist settings. Next week they hope to launch materials for pupils not able to access all aspects of their current offer." Information taken from the Oak National Academy website (<https://www.thenational.academy/information-for-parents-pupils/>)

The Oak National Academy lessons can be accessed here: <https://www.thenational.academy/online-classroom>

As you are aware, at Victoria Dock Primary School we provide a home learning pack every week which is created by our class teachers. Although we have these plans already in place, we understand that some families may prefer to work from the materials made available through the Oak National Academy. This is absolutely fine and we are thrilled to see so many children learning at home and taking the opportunity to also do all kinds of things at home which are not usually taught in the classroom.

Feel free to continue to use our home learning grids (like the one below) or the lessons provided by the Oak National Academy. Either way, we would love you to keep in touch and show us the wonderful things you are doing at home, using Seesaw, Clasdojo or Twitter.

Stay safe and we look forward to returning to school to see everyone's smiling faces.

Home Learning Grid

Year 3

Week Commencing – 27.04.20

*Please note work can be copied and completed into workbooks without the need to print the worksheets.

	1	2	3	4	5
Phonics/ Spelling	Complete the word maze activity below to find out Which warrior stole the shield. Use to Y3/4 spellings mat to help if you need to.	Practice your handwriting by writing some of the spellings from the yr3 and 4 spelling mat. See sheet for which words to practice.	Complete the word maze activity below to find out which greedy animal stole the apple. Use to Y3/4 spellings mat to help if you need to.	Practice your handwriting by writing some of the spellings from the yr3 and 4 spelling mat. See sheet for which words to practice.	Complete the prefix sheet below or on a sheet of paper.
Reading	- Read and listen to the poem 'Bathroom Fiddler' by Michael Rosen. - Answer comprehension questions about the poem (see sheet).	Learn the poem off by heart. - Practise saying it in front of a mirror using intonation, volume and actions to add expression. - Can you perform the poem in the style of a rap	Complete 'All about Spring' comprehension activity.	Summarising questions based on extract 'Superpowers'.	First News 'Crazy but true.'
Writing	Creative writing – identify with a character. See sheet below.	Creative writing - Complete the sorting out meaning. See sheet below.	Complete Inferencing and imagining plot sheet below.	Complete the sheet below called Retrieve information from a non-fiction text	Complete the summarising sheet on paper or on the sheet.

Prefixes

A prefix goes at the beginning of a word and changes its meaning. There are a number of different prefixes.

Task One.

The prefix un-

This prefix is used to make opposites.

Make these words opposites by adding un-

1. happy
2. safe
3. healthy
4. pleasant
5. easy
6. truthful
7. tidy
8. lucky

Task Two.

Using the words you have created in task one, copy and complete these sentences.

1. A person who tells lies is
 2. A classroom that is not neat is
 3. A person that worries a lot is
 4. Someone who is miserable is
 5. Something that is not nice to look at is
 6. A person who doesn't feel well is
-

Bathroom Fiddler

By Michael Rosen

I'm the bathroom fiddler, The bathroom twiddler, The foodler and the doodler, The dawdler and the diddler, I dabble and I dabble, I meddle and I muddle, When it's time for me to wash, When I know it's time for bed.

When I go up to the bathroom to get ready for bed I don't get washed straight away I fiddle and I muck. I pick up the toothbrush and I bite the bristles, I get the bristles in my teeth and I pull I pull I heave I have a tug-o-war with the toothbrush I'm winning I'm winning! YEURCHK. My mouths full of bristles.

I get the can of talcum powder I hold it in my hand I drop my hand down fast and out comes a puff of powder but it falls to the floor. HEY! IT'S SNOWING IN HERE.

I make the mixtures in the sink pour in the shampoo and the bubble bath whisk it all up to make the bubbles then I say, "OKAY you bubbles, you're finished." At that, I blow huge puffs of air and the bubbles pop all over the place.

Then I stick my finger down the plughole and scoop out the mucky stuff down there. And then I stand and dream, sucking on the sponge. And then I stand and dream, sucking on the sponge. And dream, sucking on the sponge. Sucking on the sponge. On the sponge. The sponge. Sponge.

Bathroom Fiddler, a poem by Michael Rosen.

Comprehension Questions.

Read or listen to the poem, then answer these questions.

Do you think the person in this poem is a child or an adult? Why?

Why do you think they are messing about in the bathroom?

What does the word 'dawdle' mean?

When we mess about to avoid doing something, it's called 'procrastinating'. Are there any times at home when you procrastinate?

Look up 'talcum powder' images on the Internet. Why might the person in the poem say 'it's snowing'?

Do you think the person in the poem is relaxed or anxious at the end? Which words or phrases make you think that?

All About Spring

Spring is one of the four seasons and is the season that comes after winter and before summer. Spring starts on 20th March and ends on the 21st June. Spring is the season when we change our clocks forward one hour. In spring, the weather is often unpredictable and we have a mixture of sunny and rainy days.

What happens to the animals?

Animals such as hedgehogs, grass snakes, lizards, adders, frogs and toads come out of hibernation on the first warm spring days. Animals also start to reproduce - you might see frogspawn, which looks like jelly, in ponds.

Some animals move about a lot more in spring, such as squirrels. You can see squirrels scampering about, looking for food and climbing trees.

For many birdwatchers, spring is an exciting time of the year. This is because there are lots of migrant birds that come back to the UK in the spring. With the warmer weather, you can see swifts, cuckoos and nightingales.

Did You Know...?

Hibernation isn't just a long sleep. During hibernation, creatures slow down their breathing and heart rates to save energy.

Bats can slow their heart rates down from 400 beats per minute, to 11!

What happens to the plants and the insects?

Nature is very busy in spring and there are lots of changes. You can see the trees and bushes sprout new leaves again and many plants flower because the air and soil are warmer and there are more daylight hours.

Many more insects can be spotted in spring, including butterflies and bees, which like the flowers. Insects play a crucial role in pollination (the creation of new seeds) and help plants to reproduce.

The Flowering Plant Life Cycle

Easter

Easter is a celebration that happens in spring in the northern hemisphere. It started as a religious festival and now many people celebrate it with chocolate eggs, games or an Easter egg hunt. Easter Sunday always falls on a day between 22nd March and 25th April.

Questions

1. Spring is the season that comes between? Tick **one**.

- autumn and winter
- summer and autumn
- winter and summer
- autumn and summer

2. Read the **What happens to the animals?** section.

Why do you think some birdwatchers find spring exciting? Use evidence from the text in your answer.

3. Name **two** things that animals do during hibernation.

4. Which migrating birds can you see in spring? Tick **one**.

- cuckoos
- swifts
- nightingales
- all of the above

5. Read the **What happens to the plants and insects?** section. **Find** and **copy** a word that means **important**.

6. Number the statements to order the events of a plant life cycle. The first one has been done for you.

	The seeds spread out.
1	The seeds grow when it is warm and wet.
	The plant sprouts roots.
	Pollen in flowers are used to make seeds.
	The plant grows leaves.

7. Easter Sunday falls on a day between 22nd March and...? Tick **one**.

- 25th March
- 22nd April
- 25th April
- 22nd March

8. In your own words, explain why plants and trees grow leaves and flowers in spring.

Chapter 1

Superpowers

"If you could have a superpower, what would it be?"

Dressed up in a brightly-coloured costume with a blue cape, Miss Higgins was posing the question to both her class and Mr Jay's as both groups of children crowded into one hot classroom together at the end of another lesson working on their 'superheroes' topic. It was a topic that had sparked great enthusiasm so far, from children and teachers alike. Mr Jay was sporting a navy cape over a teal all-in-one suit with a gadget belt, a mask and long yellow boots.

"I would definitely choose to fly!" suggested someone.

"I want to freeze time!" said another.

"I'd be invisible so I could spy on people or scare them!" laughed Benji.

"Interesting ideas," Mr Jay smiled. "Although I'm not sure that's such a kind choice, Benji. Perhaps you might think of what good your powers could be used for instead of spying and scaring people."

Benji still thought being invisible would be a rather

funny power to have. Carefully and quietly, he reached his hand around the back of Freya and tapped her left shoulder. Instinctively, her head snapped to the left, and when she found no one there she looked back to her right to see Benji giggling.

"If I were invisible, I could do that all day and you'd have no idea who it was, even if I was standing right in front of you," he whispered.

"You can be so annoying sometimes! I'd know it was you even if I couldn't see you!" Freya retorted with a half-smile.

She was right. Benji had a mischievous streak that occasionally bordered on irritating, but the pair were good friends and always knew how to make each other laugh. They had been friends since they were toddlers, as they had always lived on the same street, often having adventures that were mainly concocted by Benji. Now, they hung around together at school even though they were in separate classes. Luckily, the two classes often paired up for topic lessons, and Benji liked to use this time to act daft with his friend.

Read the extract from *Our Teachers Are Superheroes* and answer the questions.

What is the main message in the first two paragraphs? Tick **one**.

- That children like superheroes.
- That Mr Jay had great enthusiasm.
- That the teachers were dressed up as superheroes.
- That the children were gathered at school.

This chapter is called **Superpowers**.

Based on what you have read so far, write a new title for the chapter.

Sum up Benji's preferred superpower in fewer than ten words.

Number the following events 1-5 to show the order in which they appear in the text. The first one has been done for you.

My Jay said that they had some interesting ideas.

Benji tapped Freya on the shoulder.

Someone said that they would like to be able to fly.

Freya and Benji live on the same street.

Freya called Benji annoying.

1

CRAZY BUT TRUE

KEEPING YOUR DISTANCE

A father and son from America have invented a funny way to make sure people are keeping two metres apart from each other!

They call it the Social Distancing Circle. The pair linked together pipes to make the circle, then covered it with a tarpaulin. A video of them wearing the contraption and taking a wander in the park has been viewed millions of times.

“There were a few confused people,” admitted the son. His dad added: “Some of them thought we were flying a big kite, others thought it was a trampoline.”

Fans of *Doctor Who* will be familiar with the terrifying Daleks and their famous catchphrase, “EXTERMINATE!”

Now they’re taking to the streets of Whitby! A Dalek was spotted patrolling the local area, warning: “All humans must self-isolate by order of the Daleks!”

The dustbin-shaped robots first appeared on TV way back in 1963. Many people still remember being scared of them when they were little.

HAIR-LARIOUS HAIRDOS

A hairdresser in America has found a funny way to practise her skills during the lockdown.

While Geoff Clark works from home on his computer, his girlfriend Heidi styles his long hair – and shares the pictures! As you can see, she often chooses to make him look like a famous character, including Princess Leia from *Star Wars* and Poppy from *Trolls*. Heidi said that Geoff “has a heart of gold for letting me do this and post it”!

Questions on: 'Crazy but True'

1) What links all these 'Crazy but True' stories?

Look at the story 'Keeping your distance!'

2) Why have a father and son made a big plastic circle?

3) What is a 'contraption'?

- A mechanical or electrical gadget
- A machine or device that looks quite strange
- A cutting-edge invention

4) What was the 'Social Distancing Circle' mistaken for?

1: 2:

Look at the story 'Hair-larious hairdos'.

5) Can you explain the **pun** (play on words) in the headline?

Look at the story 'SELF-ISOLATE!'

6) What do you find out about the Daleks?

TV programme:

Shape:

Favourite saying:

Type of character:

7) What is this Dalek saying as it moves around the streets of Whitby? Why do you think someone has made this Dalek?

Consider all the news.

8) True or false?

TRUE FALSE

All the stories are from America.		
All the stories contain quotes.		
All the stories are about pictures or videos shared on the internet.		
All the stories include characters from TV or film.		
All the stories hope to make you smile.		

IDENTIFY WITH A CHARACTER

What can you hear?
What can you see?
How do you feel?
Who is in the crowd?
What can you feel beneath your feet?
What are you thinking?

LA: Write 3 sentences about what the athlete must be feeling.

You are at the starting block.
You are getting into position.
You are looking at the finish line ahead.

SORTING OUT THE MEANING OF WORDS

These are all words and phrases for happy...

merry

jolly

thrilled

untroubled

pleased

overjoyed

over the moon

delighted

1) Sort the words above out into groups of words that you think mean really happy compared to the words that mean just a little bit happy...

Really happy
words

Happy words

Slightly happy
words

Tip: It's a bit like a number line, but for words!

2) In a thesaurus, look for words for 'sad'. Then sort them on a word line like above.

HA challenge: Add more words to the 'happy' word line, using a thesaurus.

INFERENCE/IMAGINING A PLOT

This is the first scene in a film.
What kind of film do you think it is? Why?

HA Challenge: Use a thesaurus to find adjectives (describing words) that you could use to describe this photograph.

Retrieving Information from a Non-fiction Text

Honey Bees

Honey Bees are one of the 20,000 species (types) of bees. They make and look after honey. In Britain, the number of Honey Bees has been getting smaller with every year. Scientists think there are less and less bees because of strange weather and changes in farm plants. In winter, honey bees stop flying when the temperature reaches below 10°C. During this time the bees return to their hive and shiver together which keeps the temperature in the hive warm. When a group of bees lives together it is called a colony. The bees protect the colony by using a sting if they notice danger. They sting the enemy and can detach the sting from their bodies, flying away safely. The honey bee then eventually dies once it has lost its sting.

Instructions:

Read this text twice.

Then (without reading it again) write everything you now know about Honey Bees.

HA Challenge:

Think of 3 sub headings you could use to split up parts of this text.

SUMMARISING

This means when you say what something is about.

Instructions

Summarise the character in no more than 10 words.

E.g. Goldilocks: a little girl looking for food and shelter. (8 words).

Can you do the same with the following characters?

- Little Red Riding Hood
- Cinderella
- Wayne Rooney
- The Queen
- Incredible Hulk

HA Challenge: Think of a famous person you know and write a summary about them.

Fractions of a set of objects (1)

- 1 Here are some counters.

- a) Circle $\frac{1}{4}$ of the counters.

- b) How many counters did you circle?

- c) What is $\frac{1}{4}$ of 12?

- 2 Draw counters in the bar models to help you complete each number sentence. The first one has been done for you.

a) $\frac{1}{2}$ of 8 = 

b) $\frac{1}{2}$ of 16 = 

c) $\frac{1}{4}$ of 8 = 

d) $\frac{1}{4}$ of 16 = 

3

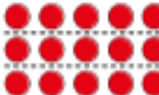

To find a half I need
to divide by 2

Do you agree with Dexter? _____

Talk about it with a partner.

4

Complete the table.

Fraction	Division	Example	Drawing
one half	divide by 2	$\frac{1}{2}$ of 6 = 3	
one quarter		$\frac{1}{4}$ of 8 = 2	
			
			

- 5 Huan uses a bar model and base 10 to find $\frac{1}{3}$ of 36

Use Huan's method to complete the calculations.

- a) $\frac{1}{3}$ of 63 = c) $\frac{1}{4}$ of 92 =
 b) $\frac{1}{4}$ of 48 =

- 6 Nijah uses a bar model and place value counters to find $\frac{1}{3}$ of 36

Use Nijah's method to complete the calculations.

- a) $\frac{1}{3}$ of 96 = c) $\frac{1}{4}$ of 52 =
 b) $\frac{1}{5}$ of 60 =

- 7 Which amount is greater? Tick your answer.

$\frac{1}{3}$ of £75 or $\frac{1}{5}$ of £75

Show your workings.

- 8 Complete the number sentences.

- a) $\frac{1}{2}$ of = 30 c) $\frac{1}{5}$ of = 50
 b) $\frac{1}{4}$ of = 20

- 9 Rosie, Amir and Alex each find a fraction of 24 using counters.

- a) Order the children from least counters to most counters.

_____ _____ _____
 least counters most counters

- b) What fraction of the counters does Alex have?

- c) Rosie and Amir put their counters together.

Write their total number of counters as a fraction of 24

Fractions of a set of objects (2)

- 1 Draw counters in the bar models to help you complete each number sentence.

a) $\frac{2}{3}$ of 15 =

b) $\frac{3}{4}$ of 8 =

c) $\frac{2}{5}$ of 20 =

- 2 Match the questions and answers.

$\frac{2}{3}$ of 9 = ?

9

$\frac{3}{5}$ of 15 = ?

6

$\frac{5}{6}$ of 12 = ?

15

$\frac{3}{4}$ of 20 = ?

10

- 3 What is $\frac{6}{6}$ of 18?

How do you know?

- 4 Brett uses a bar model and base 10 to find $\frac{2}{3}$ of 36

Use Brett's method to complete the number sentences.

a) $\frac{2}{3}$ of 63 =

b) $\frac{3}{4}$ of 48 =

c) $\frac{3}{4}$ of 92 =

- 5 Kim uses a bar model and place value counters to find $\frac{2}{3}$ of 36

Use Kim's method to complete the number sentences.

a) $\frac{2}{3}$ of 96 =

b) $\frac{3}{5}$ of 60 =

c) $\frac{3}{4}$ of 52 =

6 Complete the number sentences.

a) $\frac{2}{3}$ of = 30

b) $\frac{3}{4}$ of = 30

c) $\frac{5}{6}$ of = 30

7

Tommy

To find $\frac{3}{4}$ of 12,
you divide by 4 and then
multiply the answer by 3

To find $\frac{3}{4}$ of 12,
you divide by 3 and then
multiply the answer by 4

Dexter

Who is correct? _____

How do you know? Show your working.

8 Dora, Whitney and Ron each find a fraction of 24 using counters.

Dora

I have $\frac{5}{6}$ of 24

I have $\frac{2}{3}$ of 24

Whitney

Ron

I have 18 counters.

a) Who has the most counters? Show your workings.

b) How many more counters does Dora have than Whitney?

9 Write fractions to make the statements correct.

of 36 < 18

of 36 = 18

of 36 > 18

How many different answers can you find for each?
Compare with a partner.

Fractions of a set of objects (3)

- 1 In a class of 32 children, three eighths are girls.
How many children are boys?

- 2 Alex is taking part in a 10 km race.

She has run two fifths of the race.

What distance does she have left to run?

 km

- 3 Filip has £3 and 20p.

He spends half of his money.

How much does he have left?

£ and p

- 4 Teddy opens a bag of cherries and puts $\frac{1}{2}$ on a plate.

How many cherries were there in the whole bag?

- 5 Ron has £4 and 50p.

He decides to share the money equally between himself and his two sisters.

How much money will each child get?

£ and p

- 6 A bag of potatoes weighs 500 g.

Annie's dad uses one quarter of the potatoes to make a shepherd's pie.

What is the mass of the potatoes left in the bag?

 g

- 7 Dexter spends one third of his money.
He has these coins left.

How much did Dexter spend?

£ and p

- 8 Eva has a bag of 20 sweets.

She eats $\frac{1}{4}$ of the sweets.

She gives $\frac{1}{5}$ of the sweets that are left to Dora and 2 sweets to her mum.

How many sweets does Eva have left?

- 9 Whitney has a box of raisins.

She eats $\frac{1}{4}$ of the raisins and gives 3 to her brother.

She has 9 raisins left.

How many raisins were in the box at the start?

- 10 Here is a rectangle.

The perimeter of the rectangle is less than 30 cm.

Side a is one half of the length of side b .

- a) Complete the table to show the different possible integer lengths of side a and side b .

Length of side a	Length of side b	Perimeter
1 cm	2 cm	6 cm

- b) What are the longest possible integer lengths of side a and b ?

side a _____

side b _____

- c)

I think a can be 5 cm.

Talk to a partner about why Dexter is wrong.

Equivalent fractions (1)

1 Shade the bar models to represent the fractions.

a) Shade $\frac{1}{2}$ of the bar model.

b) Shade $\frac{2}{4}$ of the bar model.

What do you notice?

2 Complete the equivalent fractions.

3 Shade the bar models to represent the equivalent fractions.

Can you find any more equivalent fractions using the bar models?

4 Match each bar model to its equivalent fraction.

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{1}{4}$$

$$\frac{1}{8}$$

5 Shade the bar models to complete the equivalent fractions.

a) $\frac{1}{2} = \frac{\square}{12}$

b) $\frac{1}{3} = \frac{\square}{12}$

c) $\frac{1}{6} = \frac{\square}{12}$

6 The bar models represent fractions.

A

C

B

D

Which is the odd one out? _____

Why do you think this?

7 This bar model represents $\frac{3}{4}$

Tick the bar models that can be used to show a fraction that is equivalent to $\frac{3}{4}$

Shade the bar models to support your answers.

Talk to a partner about your answers.

Equivalent fractions (2)

1 Shade the bar models to represent the fractions.

a) Shade $\frac{1}{2}$ of the bar model.

b) Shade $\frac{2}{4}$ of the bar model.

c) Shade $\frac{3}{6}$ of the bar model.

d) What do you notice?

e) Write another fraction that is equivalent to $\frac{1}{2}$

2 Shade $\frac{2}{3}$ of each bar model.

a)

b)

c)

d) Use your answers to parts a), b) and c) to complete the equivalent fractions.

$$\frac{2}{3} = \frac{\square}{6} = \frac{8}{\square} = \frac{\square}{15}$$

3 Mo is finding equivalent fractions.

Do you agree with Mo? _____
Explain your answer.

4 Find the missing numbers.

5 Here is a number line.

a) What fraction is each shape pointing to?

= =

b) A circle is halfway between the triangle and the square.

Draw the circle on the number line.

c)

Do you agree with Eva? _____

Show how you worked this out.

d) Write three equivalent fractions for each shape.

Compare answers with a partner.

Van Gogh's 'Bedroom'

Faith Ringgold 'Room'

Lubaina Himid 'Room'
